JOURNAL OF THE

Air Pollution Control

ASSOCIATION

ANNUAL INDEX OF AUTHORS AND TITLES

Volume 18 (January-December 1968)

This annual index of authors and titles for Volume 18 of the *Journal of the Air Pollution Control Association* is published as a reader service on the following specially-numbered pages. The author index, appearing on pages ii through iv, lists authors alphabetically and their works chronologically. The title index, appearing on pages v through vii, is subdivided into ten broad classifications with titles listed alphabetically in each category.

AIR POLLUTION CONTROL ASSOCIATION, 4400 Fifth Avenue, Pittsburgh, Pa. 15213

AUTHOR INDEX

Achinger, W. C. A guide for selected sampling methods for different source conditions. 18(9) 606–609

Adams, D. F. Analysis of sulfur-containing gases in the ambient air using selective pre-filters and a microcoulometric detector. 18(3) 145–148

Aften, P. W. A proposed design for grain elevator dust collection. 18(11) 738–742

Albert, R. E. Use of monodisperse aerosols for studies on respiratory track deposition and clearance. 18(10) 672–674

Annis, J. C. Particle studies at Kansas State University. 18(10) 693

Bamesberger, W. L. Analysis of sulfur-containing gases in the ambient air using selective pre-filters and a microcoulometric detector. 18(3) 145–148

Battigelli, M. C. Ciliary activity and pulmonary retention of inhaled dust in rats exposed to sulfur dioxide. 18(12) 821–823

Baxter, W. A. Recent electrostatic precipitator experience with ammonia conditioning of power boiler flue gases. 18(12) 817–820

Beadle, R. E. AEC sponsored laboratory work with aerosols. 18(10) 690–691

Benforado, D. M. Fume control in wire enameling by direct-flame incineration. 18(1) 24–26

Billings, C. E. Aerosol studies at GCA technology division. 18(10) 687–688

Bils, R. F. Functional and morphological response of in vitro lung and myocardial test objects to experimental gas environments. 18(1) 9–11

——. Ultrastructural effects of air pollution on lung cells. 18(5) 313–314

Booras, S. G. A comparison of conductivity and West-Gaeke analyses for sulfur dioxide. 18(9) 612–615

Borg, K. M. Carbon monoxide in the atmosphere. 18(2) 106–110

Borgwardt, R. H. Filtration characteristics of fly ash from a pulverized coal-fired power plant. 18(6) 387–390

Boubel, R. W. An emission sampling probe installed, operated, and retrieved from ground level. 18(2) 84–85

Brodovicz, B. A. Air quality criteria for Pennsylvania. 18(1) 21–23

Brown, P. M. Study of the coagulation of aerosols and scavenging of particles by drops or fibers. 18(10) 682

Bulba, E. Automatic stack monitoring of a basic oxygen furnace. 18(4) 214–215

Bump, R. L. The use of electrostatic precipitators on municipal incinerators. 18(12) 803–809

Calvert, S. Removal of small particles from air by foam in a sieve-plate column. 18(4) 240–245

——. Particle collection in a venturi scrubber. 18(10) 677–678

Caretto, L. S. Rapid continuous determination of nitric oxide concentration in exhaust gases. 18(2) 102–105

Carpenter, S. B. Full-scale study of plume rise at large coal-fired electric generating stations. 18(7) 458–465

Carson, J. E. Stack design parameters influencing plume rise. 18(7) 454–457

Cassell, E. J. Are we ready for ambient air quality standards. 18(12) 799–802

Charlson, R. J. Atmospheric aerosol research at the University of Washington. 18(10) 652–654

Chass, R. L. An appraisal of Rule 66 of the Los Angeles County Air Pollution Control District. 18(11) 743–747

Cole, H. M. Ciliary activity and pulmonary retention of inhaled dust in rats exposed to sulfur dioxide. 18(12) 821–823

Conner, W. D. Development of a smoke guide for the evaluation of white plumes. 18(11) 748–750

Coykendall, J. W. New high-efficiency mist collector. 18(5) 315–318

Crampton, E. W. Husbandry vs. fluoride ingestion as factors in unsatisfactory dairy cow performance. 18(4) 229–234

Cranshaw, D. D. The use of a computer based total management information system to support an air resource management program. 18(3) 158–159

Cross, F. L., Jr. Field control of a dolomite plant. 18(1) 27–29

Crowe, M. J. Toward a "Definitional Model" of public perceptions of air pollution. 18(3) 154–157

Dalmat, H. T. Nationwide air pollution control training efforts: Status Quo vs. needs. 18(3) 180–182

Darley, E. F. Plant exposure chambers for dust studies. 18(1) 28–29

Davis, R. J. Aerosol studies in the reactor safety program at Oak Ridge National Laboratory. 18(10) 675–677

DeLange, J. E. Evaluating dust arresting equipment on large coal-fired steam generators. 18(2) 95–97

Dennis, R. Aerosol studies at GCA technology division. 18(10) 687–688

Deutsch, S. Acid potassium iodide method for determining atmospheric oxidants, 18(2) 78–83

Dickson, J. E. An appraisal of Rule 66 of the Los Angeles County Air Pollution Control District. 18(11) 743–747

Dochinger, L. S. The impact of air pollution on Eastern White Pine: The chlorotic dwarf disease. 18(12) 814–816

Dorsey, J. A. A source sampling technique for particulate and gaseous fluorides. 18(1) 12–14

Douglass, I. B. Some chemical aspects of kraft odor control. 18(8) 541–545

Duffee, R. A. Appraisal of odor-measurement techniques. 18(7) 472–474

Dugger, W. M., Jr. Factors affecting ozone sensitivity and susceptibility of cotton plants. 18(12) 810–813

Edmunds, G. F., Jr. Ozone needle mottle of pine in Southern California. 18(2) 73–77

Engelmann, R. J. AEC sponsored aerosol work in the outdoors. 18(10) 656–657

Erickson, E. E. Fluidized bed fly ash filter. 18(10) 684–685

Evans, M. J. Functional and morphological response of in vitro lung and myocardial test objects to experimental gas environments. 18(1) 9–11

Falgout, D. A. Determination of H_2S exposure by dynamic sampling with metallic silver filters. 18(1) 15–20

Faoro, R. B. Air quality and characteristic community parameters. 18(8) 545–549

Fensterstock, J. C. Air quality and characteristic community parameters. 18(8) 545–549

Fortener, E. J. Aerosol research and the American Air Filter Co. 18(10) 670–671

Fraser, D. A. Ciliary activity and pulmonary retention of inhaled dust in rats exposed to sulfur dioxide. 18(12) 821–823

Frizzola, J. A. Full-scale study of plume rise at large coal-fired electric generating stations. 18(7) 458–465

Gartner, I. Manpower policies in selected air pollution control agencies. 18(4) 211–215

——. Staff salaries in air pollution control agencies. 18(9) 579–585

Gaulding, C. L. Definition of air quality control regions. 18(9) 591–595

Gieseke, J. A. Aerosol research at Battelle-Columbus. 18(10) 682–684

Gill, J. S. Aerosol studies in the reactor safety program at Oak Ridge National Laboratory. 18(10) 675–677

Greco, J. Experience with electrostatic fly-ash collection equipment serving steam-electric generating plants. 18(8) 523–528

Gucker, F. T. Physico-chemical studies of aerosols. 18(10) 664–665

Hackney, J. D. Functional and morphological response of in vitro lung and myocardial test objects to experimental gas environments. 18(1) 9–11

Hall, R. M. Operating experience with a flooded disc scrubber—a new variable throat orifice contactor. 18(5) 319–323

Hangebrauck, R. P. A status report on controlling the oxides of sulfur. 18(1) 5–8

——. Effects of air-fuel stoichiometry on air pollutant emissions from an oil-fired test furnace. 18(5) 332–337

Hanst, P. L. Detection and measurement of air pollutants by absorptions of infrared radiation. 18(11) 754–759

Harding, C. I. Determination of H_2S exposure by dynamic sampling with metallic silver filters. 18(1) 15–20

Harrington, R. E. Filtration characteristics of fly ash from a pulverized coal-fired power plant. 18(6) 387–390

Harris, D. N. Another look at New York City's air pollution problem. 18(6) 406–410

Harris, F. S., Jr. Lasar light scattering and aerosols. 18(10) 659–660

Hemeon, W. C. L. Technique and apparatus for quantitative measurement of odor emissions. 18(3) 166–170

Hendricks, C. D. Uniform particle sources for pollution research. 18(10) 669–670

Henschen, H. C. Wet vs. dry gas cleaning in the steel industry. 18(5) 338–342

Hidy, G. M. Study of the coagulation of aerosols and scavenging of particles by drops or fibers. 18(10) 682

Hill, D. M. Performance of exhaust control devices on 1966 model passenger cars. 18(4) 246–248

Hindawi, I. J. Injury by sulfur dioxide, hydrogen fluoride, and chlorine as they were observed and reflected on vegetation in the field. 18(5) 307–312

Hochheiser, S. Air pollution emissions from jet engines. 18(6) 392–394

Hochrainer, D. Study of the coagulation of aerosols and scavenging of particles by drops or fibers. 18(10) 682

Holtz, P. The Sunya-ASRC aerosol detector. 18(10) 667–668

Huey, N. A. The lead dioxide estimation of sulfur dioxide pollution. 18(9) 610–611

Huffman, J. R. Another look at New York City's air pollution problem. 18(6) 406–410

Jackson, M. Aerosol Research at IIT Research Institute. 18(10) 660–661

Jaffe, L. S. Ambient carbon monoxide and its fate in the atmosphere. 18(8) 534–540

Johnson, K. L. Citizen complaints of air pollution in Northeastern Illinois. 18 (6) 399–401

Kaiser, E. R. The sulfur balance of incinerators. 18(3) 171–174

Katz, J. A filter test method for rapid weight distribution of dust in gas streams to evaluate dust collectors. 18(6) 401–402

Kemnitz, D. A. A source sampling technique for particulate and gaseous fluorides. 18(1) 12–14

Kerker, M. Preparation of submicron aerosols of narrow size distribution and their analysis by light scattering. 18(10) 665–667

Kistler, R. Manpower policies in selected air pollution control agencies. 18(4) 211–215

Kopczynski, S. L. Laboratory experiences in analysis of nitric oxide with "Dichromate" paper. 18(3) 160–161

Krenz, W. B. An appraisal of Rule 66 of the Los Angeles County Air Pollution Control District. 18(11) 743–747

APCA COMMITTEES

TA-5 Dust, Fumes, Mists and Fog Collectors Committee. Mechanical dust collector selection and performance evaluation guide. 18(7) 475–477
TA-8 Meteorological Committee. Annotated Bibliography for air pollution meteorology. 18(7) 449–453
TI-2 Chemical Industry Committee. Carbon black. 18(4) 216–228
TI-5 Public Utilities Committee. Dust controls for outdoor working areas. 18(8) 519–522

NOW AVAILABLE . . .

TECHNICAL MANUAL NO. 3

. . . a 54-page collection of informative reports from APCA's TI-2 Chemical Industry Committee.

Partial table of contents: manufacture of sulfuric acid . . . hydrochloric acid . . . chlorine and sodium hydroxide . . . air pollution aspects of DDT production . . . the inedible rendering industry . . . soap and detergent manufacture

Future informative reports from the TI-2 Committee can be added to this manual.

Price to APCA members, $2.00; to non-members, $3.00.
Enclose payment with request to

TITLE INDEX

For the convenience of the reader, this index has been subdivided into ten broad classifications, with titles listed alphabetically within each category. The groupings are as follows:

1. The Sources and Nature of Air Pollution
2. The Transport of Air Pollution
3. The Effects of Air Pollution
4. Controlling Air Pollution
5. Methods of Measurement
   (sampling, detection, evaluation, techniques, testing)
6. Survey Results and Data Interpretation
7. The Law and Air Pollution
   (legislation, administration, enforcement, standards, programs)
8. Education and Information Programs
9. Creating a Climate for Control
   (public relations, management concepts, social aspects)
10. Special Reports
    (not otherwise classified)

1. THE SOURCES AND NATURE OF AIR POLLUTION

Aerosol research activities at the health and safety laboratory, U. S. Atomic Energy Commission—1968. J. W. Thomas. 18(10) 685–687

Aerosol research at Battelle-Columbus. J. A. Gieseke. 18(10) 682–684

Aerosol studies in the reactor safety program at Oak Ridge National Laboratory. R. J. Davis, J. Truitt, and J. S. Gill. 18(10) 675–677

Air pollution emissions from jet engines. E. R. Lozano, W. W. Melvin, Jr., and S. Hochheiser. 18(6) 392–394

Ambient carbon monoxide and its fate in the atmosphere. L. S. Jaffe. 18(8) 534–540

Atmospheric aerosol research at the University of Washington. R. J. Charlson. 18(10) 652–654

AEC sponsored aerosol work in the outdoors. R. J. Engelmann. 18(10) 656–657

AEC sponsored laboratory work with aerosols. R. E. Beadle. 18(10) 690–691

Brake lining decomposition products. J. R. Lynch. 18(12) 824–826

Carbon black. TI-2 Chemical Industry Committee (APCA). 18(4) 216–228

Carbon monoxide in the atmosphere. R. C. Robbins, K. M. Borg, and E. Robinson. 18(2) 106–110

Composition of exhaust from a regenerative turbine system. A. Lieberman. 18(3) 149–153

Effects of air-fuel stoichiometry on air pollutant emissions from an oil-fired test furnace. J. H. Wasser, R. P. Hangebrauck, and A. J. Schwartz. 18(5) 332–337

Introduction to Aerosol Research in Progress. A. R. McFarland. 18(10) 651

The need for a pollution-free vehicle. A. H. Sweet, B. J. Steigerwald, and J. H. Ludwig. 18(2) 111–113

An outline of research at Pacific Northwest laboratory related to airborne particles. L. C. Schwendiman. 18 (10) 679–680

Oxides of nitrogen from gas turbines. D. S. Smith, R. F. Sawyer, and E. S. Starkman. 18(1) 30–35

Recent Czechoslovakian research into particle collection. M. Tomaides. 18(10) 681

Some air pollution problems associated with agriculture in Texas. J. J. Stanko, J. S. Wiseman, T. B. Wimberly, and O. Paganini. 18(3) 164–165

Study of the coagulation of aerosols and scavenging of particles by drops or fibers. G. M. Hidy, G. Zebel, D. Hochrainer, and P. M. Brown. 18 (10) 682

The sulfur balance of incinerators. E. R. Kaiser. 18(3) 171–174

Uniform particle sources for pollution research. C. D. Hendricks. 18(10) 669–670

2. TRANSPORT OF AIR POLLUTION

Annotated Bibliography for Air Pollution Meteorology. TA-8 Meteorological Committee (APCA). 18(7) 449–453

A comparative study of particulate loadings in plumes using multiple sampling devices. B. R. Meland. 18(8) 529–533

Full-scale study of plume rise at large coal-fired electric generating stations. S. B. Carpenter, J. M. Leavitt, F. W. Thomas, J. A. Frizzola, and M. E. Smith. 18(7) 458–465

Measuring and relating atmospheric pollution to meterological parameters. C. M. Peterson. 18(10) 654–656

Some results of multiple-tracer diffusion experiments at Cincinnati. L. E. Niemeyer and R. A. McCormick. 18 (6) 403–405

Stack design parameters influencing plume rise. H. Moses and J. E. Carson. 18(7) 454–457

A study of air pollution sources as viewed by earth satellites. D. Randerson. 18(4) 249–253

Tracer study in an urban valley. D. B. Smith. 18(9) 600–604

3. EFFECTS OF AIR POLLUTION

Aerosol research at the Johns Hopkins school of hygiene. D. L. Swift and D. F. Proctor. 18(10) 675

Application of gas-aerosol adsorption data to the selection of air quality standards. M. J. Pilat. 18(11) 751–753

Are we ready for ambient air quality standards. E. J. Cassell. 18(12) 799–802

Ciliary activity and pulmonary retention of inhaled dust in rats exposed to sulfur dioxide. D. A. Fraser, M. C. Battigelli, and H. M. Cole. 18(12) 821–823

Cytogenetic effects of hydrogen fluoride treatment in tomato plants. A. H. Mohamed. 18(6) 395–398

Factors affecting ozone sensitivity and susceptibility of cotton plants. I. P. Ting and W. M. Dugger, Jr. 18(12) 810–813

Functional and morphological response of in vitro lung and myocardial test objects to experimental gas environments. J. D. Hackney, R. F. Bils, M. J. Evans, and D. E. Rounds. 18(1) 9–11

Husbandry vs. fluoride ingestion as factors in unsatisfactory dairy cow performance. E. W. Crampton. 18(4) 229–234

The impact of air pollution on Eastern White Pine: The chlorotic dwarf disease. L. S. Dochinger. 18(12) 814–816

3. EFFECTS (Continued)

Injury by sulfur dioxide, hydrogen fluoride, and chlorine as they were observed and reflected on vegetation in the field. I. J. Hindawi. 18(5) 307–312

Ozone needle mottle of pine in Southern California. B. L. Richards, Sr., O. C. Taylor, and G. F. Edmunds, Jr. 18 (2) 73–77

Plant exposure chambers for dust studies. E. F. Darley, S. Lerman, and R. J. Oshima, 18(1) 28–29

Ultrastructural effects of air pollution on lung cells. R. F. Bils. 18(5) 313–314

Use of aerosols to measure pulmonary dimensions. E. D. Palmes. 18(10) 671

Use of monodisperse aerosols for studies on respiratory track deposition and clearance. M. Lippmann and R. E. Albert. 18(10) 672–674

4. CONTROLLING AIR POLLUTION

Aerosol research and the American Air Filter Co. E. J. Fortener. 18(10) 670–671

Aerosol research at the Carrier Corporation. S. H. McIver. 18(10) 691–693

Concepts of electric arc furnace fume control. R. J. Wright. 18(3) 175–178

Designing for air pollution control. E. F. Spencer, Jr. 18(6), 411–413

The double contact process for sulfuric acid production. W. Moeller and K. Winkler. 18(5) 324–325

Dust controls for outdoor working areas. TI-5 Public Utilities Committee (APCA). 18(8) 519–522

The effect of polarity on particle concentration profiles in electrostatic precipitators. M. Robinson. 18(10) 688–690

European industrial air pollution control practices. H. F. Lund. 18(9) 586–589

Evaluating dust arresting equipment on large coal-fired steam generators. J. E. DeLange. 18(2) 95–97

Experience with electrostatic fly-ash collection equipment serving steam-electric generating plants. J. T. Reese and J. Greco. 18(8) 523–528

Field control of a dolomite plant. F. L. Cross, Jr. and R. W. Ross. 18(1) 27–29

Filtration characteristics of fly ash from a pulverized coal-fired power plant. R. H. Borgwardt, R. E. Harrington, and P. W. Spaite. 18(6) 387–390

Fluidized bed fly ash filter. J. P. Pitney and E. E. Erickson. 18(10) 684–685

Fume control in L-D plants. D. H. Wheeler. 18(2) 98–101

Fume control in wire enameling by direct-flame incineration. D. M. Benforado and J. Waitkus. 18(1) 24–26

Mechanical dust collector selection and performance evaluation guide. TA-5 Dust, Fumes, Mists and Fog Collectors Committee (APCA). 18(7) 475–477

New high-efficiency mist collector. J. W. Coykendall, E. F. Spencer, Jr., and O. H. York. 18(5) 315–318

Operating experience with a flooded disc scrubber—a new variable throat orifice contactor. A. B. Walker and R. M. Hall. 18(5) 319–323

Particle collection in a venturi scrubber. S. Calvert and D. Lundgren. 18(10) 677–678

Particle studies at Kansas State University. J. C. Annis. 18(10) 693

Performance of exhaust control devices on 1966 model passenger cars. W. F. McMichael, R. E. Kruse, and D. M. Hill. 18(4) 246–248

A proposed design for grain elevator dust collection. D. J. Thimsen and P. W. Aften. 18(11) 738–742

Recent electrostatic precipitator experience with ammonia conditioning of power boiler flue gases. W. A. Baxter. 18(12) 817–820

Removal of small particles from air by foam in a sieve-plate column. M. Taheri and S. Calvert. 18(4) 240–245

Some chemical aspects of kraft odor control. I. B. Douglass. 18(8) 541–545

A status report on controlling the oxides of sulfur. R. P. Hangebrauck and P. W. Spaite. 18(1) 5–8

Turbulent gas flow and electrostatic precipitation. M. Robinson. 18(4) 235–239

The use of electrostatic precipitators on municipal incinerators. R. L. Bump. 18(12) 803–809

Wet vs. dry gas cleaning in the steel industry. H. C. Henschen. 18(5) 338–342

5. METHODS OF MEASUREMENT

(sampling, detection, evaluation, techniques, testing)

Acid potassium iodide method for determining atmospheric oxidants. S. Deutsch. 18(2) 78–83

Aerosol Research at IIT Research Institute. A. Lieberman and M. Jackson. 18(10) 660–661

Aerosol studies at GCA technology division. R. Dennis and C. E. Billings. 18(10) 687–688

Analysis of sulfur-containing gases in the ambient air using selective pre-filters and a microcoulometric detector. D. F. Adams, W. L. Bamesberger, and T. J. Robertson. 18(3) 145–148

Appraisal and modification of West-Gaeke method for sulfur dioxide determination. N. M. Trieff, H. C. Wohlers, J. A. O'Malley, and H. Newstein. 18(5) 329–331

Appraisal of odor-measurement techniques. R. A. Duffee. 18(7) 472–474

Automatic stack monitoring of a basic oxygen furnace. W. P. McShane and E. Bulba. 18(4) 214–215

A comparison of conductivity and West-Gaeke analyses for sulfur dioxide. S. G. Booras and C. E. Zimmer. 18(9) 612–615

Detection and measurement of air pollutants by absorptions of infrared radiation. P. L. Hanst and J. A. Morreal. 18(11) 754–759

Determination of H_2S exposure by dynamic sampling with metallic silver filters. D. A. Falgout and C. I. Harding. 18(1) 15–20

Development of a smoke guide for the evaluation of white plumes. W. D. Conner, C. F. Smith, and J. S. Nader. 18(11) 748–750

Electrical measurement of the mass concentration of a self-preserving aerosol size distribution. K. T. Whitby and A. R. McFarland. 18(11) 760–764

An emission sampling probe installed, operated, and retrieved from ground level. R. W. Boubel and K. R. Wise. 18(2) 84–85

Errors in measurement and counting of particles using light scattering. A. E. Martens. 18(10) 661–663

A filter test method for rapid weight distribution of dust in gas streams to evaluate dust collectors. J. Katz and W. A. Verrochi. 18(6) 401–402

A guide for selected sampling methods for different source conditions. W. C. Achinger and R. T. Shigehara. 18(9) 606–609

Laboratory experiences in analysis of nitric oxide with "Dichromate" paper. D. Wilson and S. L. Kopczynski. 18 (3) 160–161

Lasar light scattering and aerosols. F. S. Harris, Jr. and G. C. Sherman. 18 (10) 659–660

The lead dioxide estimation of sulfur dioxide pollution. N. A. Huey. 18(9) 610–611

Particle counting techniques available for aerosol research. H. M. Ogle. 18(10) 657–659

Physico-chemical studies of aerosols. F. T. Gucker, E. S. Osborne, and J. Tuma. 18(10) 664–665

Plant exposure chambers for dust studies. E. F. Darley, S. Lerman, and R. J. Oshima. 18(1) 28–29

Preparation of submicron aerosols of narrow size distribution and their analysis by light scattering. M. Kerker and E. Matijevic. 18(10) 665–667

Rapid continuous determination of nitric oxide concentration in exhaust gases. T. Singh, R. F. Sawyer, E. S. Starkman, and L. S. Caretto. 18(2) 102–105

Recent aerosol research: University of Minnesota particle technology laboratory. B. Y. H. Liu. 18(10) 694–696

A source sampling technique for particulate and gaseous fluorides. J. A. Dorsey and D. A. Kemnitz. 18(1) 12–14

Standardization of methods for measurement of air pollutants. B. E. Saltzman. 18(5) 326–329

The Sunya-ASRC aerosol detector. V. A. Mohnen and P. Holtz. 18(10) 667–668

Technique and apparatus for quantitative measurement of odor emissions. W. C. L. Hemeon. 18(3) 166–170

6. SURVEY RESULTS AND DATA INTERPRETATION

Air quality and characteristic community parameters. T. B. McMullen, J. C. Fensterstock, R. B. Faoro, and R. Smith. 18(8) 545–549

Another look at New York City's air pollution problem. D. N. Harris, J. R. Huffman, and J. H. Weiland. 18(6) 406–410

The impact of computers upon air pollution research. C. E. Zimmer and G. J. Nehls. 18(6) 383–386

7. THE LAW AND AIR POLLUTION

(legislation, administration, enforcement, standards, programs)

Air quality criteria for Pennsylvania. B. A. Brodovicz. 18(1) 21–23

Application of gas-aerosol adsorption data to the selection of air quality standards. M. J. Pilat. 18(11) 751–753

An appraisal of Rule 66 of the Los Angeles County Air Pollution Control District. W. B. Krenz, J. E. Dickson, and R. L. Chass. 18(11) 743–747

Are we ready for ambient air quality standards. E. J. Cassell. 18(12) 799–802

Automatic air monitoring and telemetering to central points in Allegheny County. E. L. Stockton and W. C. Shook. 18 (3) 162–164

Controlling metropolitan pollution through regional airsheds: Administrative requirements and political problems. H. Lieber. 18(2) 86–94

Definition of air quality control regions. C. L. Gaulding. 18(9) 591–595

Manpower policies in selected air pollution control agencies. E. C. Leduc, I. Gartner, J. Sacco, and R. Kistler. 18 (4) 211–215

Preferential tax treatment for pollution control expenditures. H. C. McKee. 18(9) 596–599

The socio-political characteristics of urban governments engaged in air pollution control activities. E. C. Leduc. 18 (11) 733–737

Staff salaries in air pollution control agencies. I. Gartner. 18(9) 579–585

Text of the Air Quality Act of 1967. 18 (2) 62–71

The use of a computer based total management information system to support an air resource management program. W. J. Stanley and D. D. Cranshaw. 18(3) 158–159

8. EDUCATION AND INFORMATION PROGRAMS

Mid-Atlantic States Section of APCA announces air pollution essay contest winners. 18(6) 412–413

Nationwide air pollution control training efforts. Status Quo vs. needs. A. T. Rossano, Jr., T. H. Moller, and H. T. Dalmat. 18(3) 180–182

9. CREATING A CLIMATE FOR CONTROL
(public relations, management concepts, social aspects)

Citizen complaints of air pollution in Northeastern Illinois. K. L. Johnson. 18(6) 399–401

Toward a "Definitional Model" of public perceptions of air pollution. M. J. Crowe. 18(3) 154–157

10. SPECIAL REPORTS
(not otherwise classified)

Air Pollution Films—An Addendum. 18 (4) 255–256

Annual index of authors and titles for Volume 17 of the Journal of the Air Pollution Control Association. 18(1) i–vii

Department of Commerce reports 1967 sales of industrial gas cleaning equipment. 18(10) 700

Product Guide/1969. Directory lists manufacturers of emission control equipment and air pollution instrumentation. 18(12) 847–857

Report from the air pollution session of the National Analysis Instrumentation Symposium, held in Philadelphia, May 19–22, 1968. 18(7) 478–479

Report from the Symposium on Air Quality Criteria, held on June 4–5, 1968, in New York City. 18(7) 443–447

Summary of 61st Annual Meeting of the Air Pollution Control Association, held June 23–27, 1968 in St. Paul, Minnesota. 18(8) 507–517

Other Indexes

Author and title indexes for previous volumes of the Journal of the Air Pollution Control Association include:

Volumes 1 through 4, which was published in Volume 1 Number 1 of the APCA Abstracts, June 1955.

Volumes 5 through 15, which was published in Part II of the APCA Journal, May 1966.

Volume 16, which was published in the APCA Journal, January 1967.

Volume 17, which was published in the APCA Journal, January 1968.

TALL STACK
SHORT STACK
SPRAYING SYSTEMS CO.
SPRAY NOZZLES
for air pollution control systems
to remove fly ash, hydrocarbons, dust and other particulate matter from exhaust

Spraying Systems offers a complete selection of spray nozzles for air pollution control in exhaust gas systems . . . to meet your specifications in spray volume, spray angle, spray particle size and spray emission velocities.

Nozzles are also supplied to meet any requirement for resistance to corrosion . . . or elevated temperatures up to 2000° F.

FOR INFORMATION WRITE FOR CATALOG 25A

Equipment and systems manufacturers are invited to write for detailed engineering recommendations relative to spray nozzle selection and application.

SPRAYING SYSTEMS CO.
